FiproGuard™ Plus Topical for Dogs

FiproGuard™ Plus for dogs is the first retail generic equivalent to Frontline Plus® for dogs. FiproGuard™ Plus contains Fipronil and (S)-methoprene, the active ingredients used in Frontline Plus®. FiproGuard™ Plus topical flea and tick squeeze-on for dogs provides premium protection against fleas, ticks and chewing lice. It kills deer ticks that transmit Lyme disease as well as brown dog ticks, American dog ticks and lone star ticks. It also controls mites that may cause sarcoptic mange. Because FiproGuard™ Plus kills all stages of the flea (adult fleas, flea eggs, flea larvae and prevent development of flea pupae), it controls re-infestation for up to three months. It is waterproof and can be used on breeding, pregnant and lactating dogs. Fast-acting and long-lasting, sustained-release formula protects dogs for up to 30 days. FiproGuard™ is a trademark of Sergeant's Pet Care Products, Inc. Frontline Plus® is a registered trademark of Merial. Frontline Plus® and Merial are not affiliated with Sergeant's Pet Care Products, Inc.

Each box contains a 3 month supply
